TOSHIBA AIR CONDITIONING VISION

Better Air Solutions

Through our commitment to world-class efficiency, versatile scalability and leading quality, Toshiba Air Conditioning advances leading-edge technologies to find the most forward-thinking solutions possible for your world.

7 Senses of smartness

Because we understand your real needs, we researched and finally found 7 senses of smartness in air conditioning, which we have innovatively developed into the most advanced technologies SMMS-7. This VRF is cooling optimized for hot and humid temperature.

SMMS-7 the senses of cooling

SMMS-7 the senses of cooling

PRODUCT LINE UP

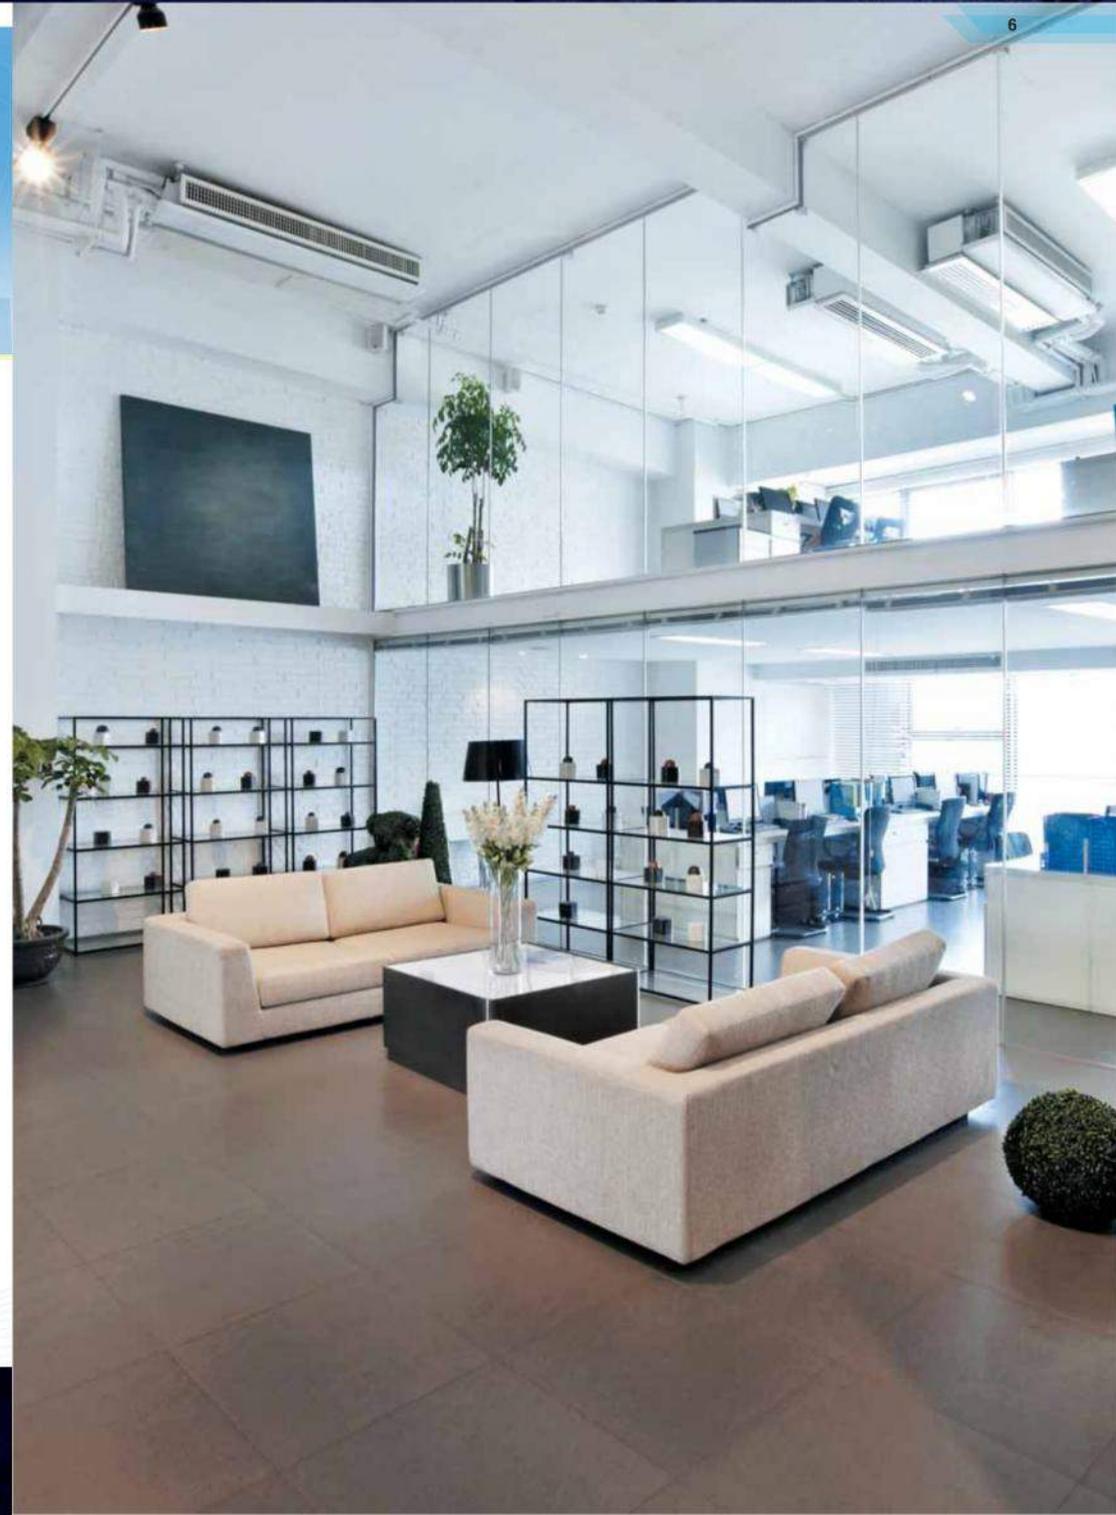

Standard model

Equivalent HP	8HP	10HP	12HP	14HP	14HP*	16HP	18HP	20HP	22HP*	24HP*
Appearance										
External dimensions (H x W x D)	1,800 x 990 x 780mm			1,800 x 1,210 x 780mm			1,800 x 1,600 x 780mm			
Refrigerant type	R410A									

*Medium Chassis Variant
*Non-Modular

Product line up

>>> Sense of space

Space saving and light weight

◀ 20 HP Model

◀ 24 HP Model

◀ 60 HP Combination model

The new compact design not only reduces the installation foot print, but also reduces the time to deliver and install.

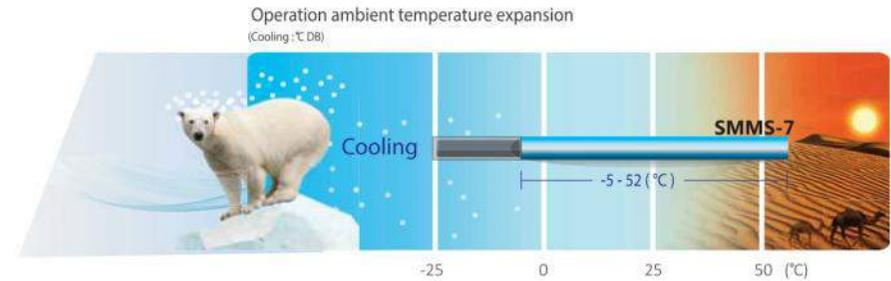

>>> Sense of endurance

Wider ambient operation

◀ Outdoor temperature range

The combination of new compressor design and system controls have enabled SMMS-7 to expand its allowable operational temperature range.

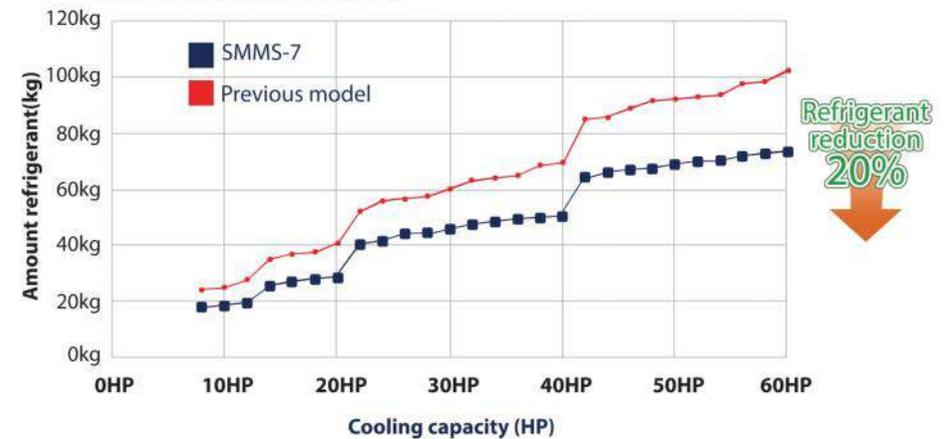

Note : Based on equivalent piping length of 7.5 m and piping height difference of 0 m.

>>> Sense of care

Environmentally oriented

◀ Reduce refrigerant amount

More than 20% by delicated cooling design*

* Testing under controlled conditions.

>>> Sense of strength
High reliability

◀ Small animal protection

To prevent the small animals from entering and interfering with the electronic components in the system, our new inverter box has been upgraded with additional protection, while allowing reliable operation. The inverter box is fitted with punched sheet metal & resin sheet.

In order to stop small animals getting into the inverter box, SMMS-7 has resin sheet. It's preventive measure to keep them from shorting out PC boards.

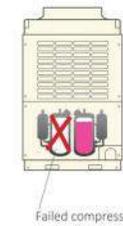

>>> Sense of Strength
High reliability

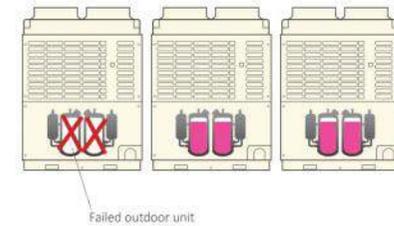

◀ Backup operation

Inverter control can be adjusted to compensate for a failed compressor or header unit and in the unlikely event of a compressor failure, backup operation is available in both a single system or as a module.

Single outdoor unit backup*

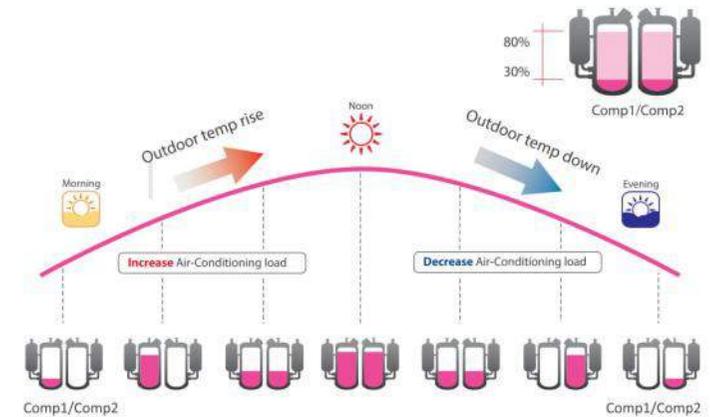

Module outdoor unit backup

◀ Reliability rotational control*

The rotational control in SMMS-7 is designed to improve system reliability by controlling the operation of each compressor to work equally under variable conditions.

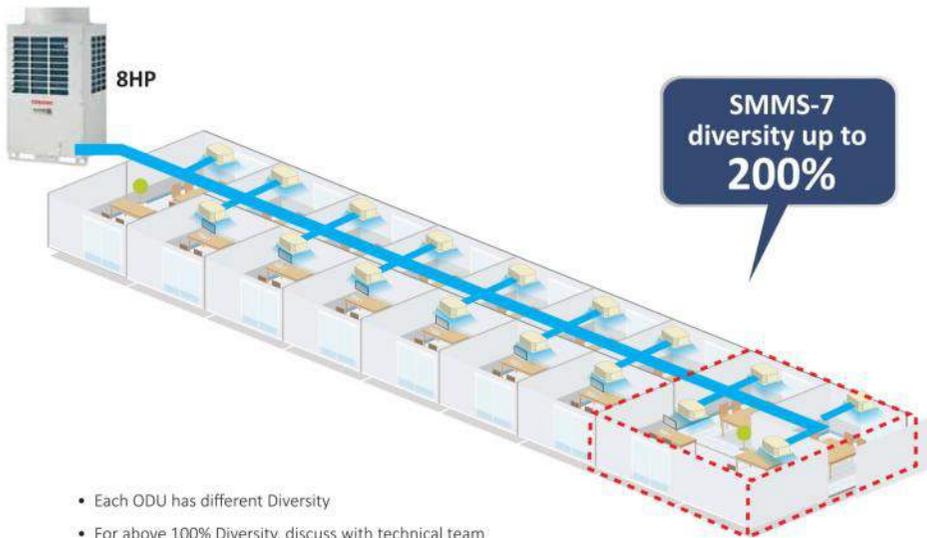

* Applicable for multiple compressor only.

>>> Sense of flexibility

Design flexibility

◀ Upto 200 % diversity

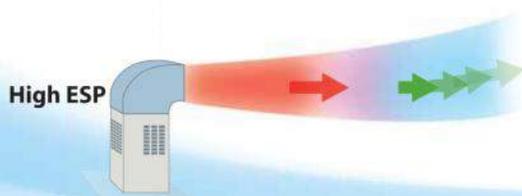

Thanks to the newly developed refrigerant circuit, the diversity of outdoor units has drastically increased. This makes it much easier to design for installations with many rooms or offices.

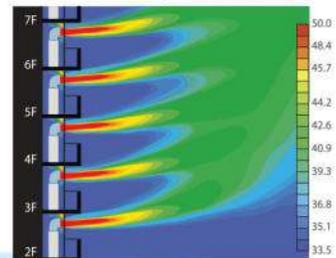

- Each ODU has different Diversity
- For above 100% Diversity, discuss with technical team

◀ The external static pressure

The SMMS-7 units are suitable for challenging installations where high external static pressure performance is needed.

Air flow simulation diagram

Note : This result is an analytical simulation, that does not guarantee actual temperatures.

>>> Sense of flexibility

Design flexibility

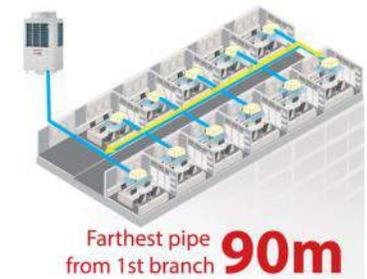

◀ Total piping length

Applied with Toshiba's unique and greatly improved technology, SMMS-7 can reach up to 1,000 meters of maximum piping length.

◀ Farthest pipe from 1st branch

The piping distance from the first branch to the furthest indoor unit is at 90 meters, increasing the flexibility of the installation within the hotel or office building.

◀ Farthest equivalent length

The maximum equivalent distance between outdoor unit and farthest indoor unit tops at 235 meters, which tops the industry class.

◀ Height between indoor units

Another industry's top class is a maximum vertical distance between indoor units which reaches up to 40 meters, equal to an entire 11-storied building. SMMS-7's enhanced piping capabilities result in more benefits for the system design, installation flexibility, as well as the less installation cost.

CAPACITY RANGE

Single unit capacity expanded

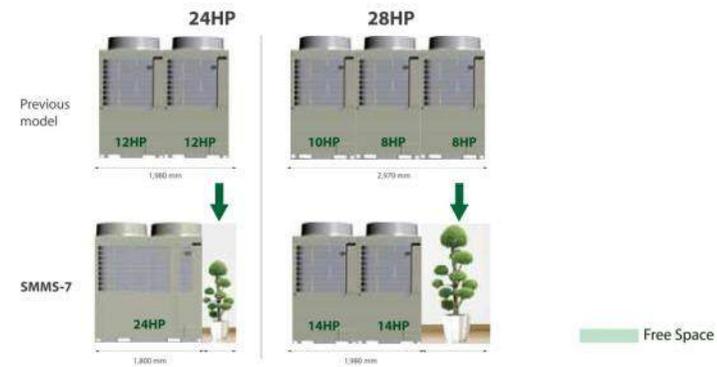

SMMS-7 comes with a larger capacity unit, producing up to 24HP on a single module platform.

*Standard model

Industry-leading installation flexibility

Outdoor units improve performance to achieve greater space efficiency that defies their compact module size to deliver greater freedom in layout design. This minimizes weight-related restrictions and allows for quicker installation.

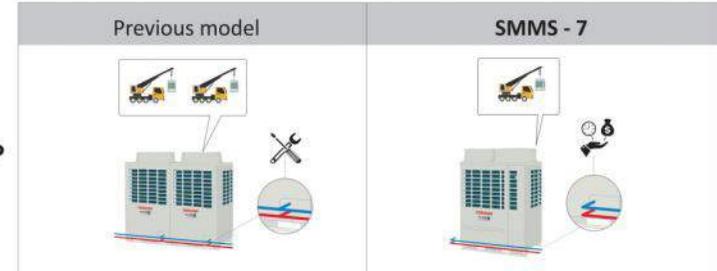

Installation flexibility

The maximum combination is available upto 60HP in one system. This helps save more time and expense on additional unit system required in the previous model. The new compact unit design also increases more flexibility on installation with less foot print.

24 HP

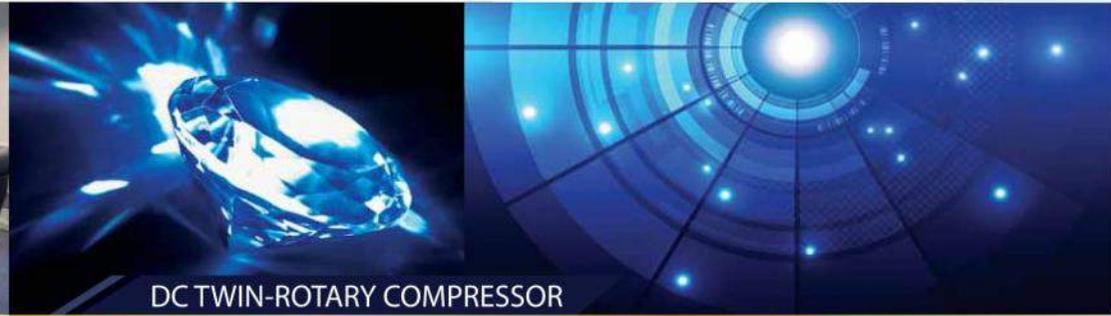

SMMS-7 is capable of covering up to 24HP with a single module. Reducing pipe work and overall installation time.

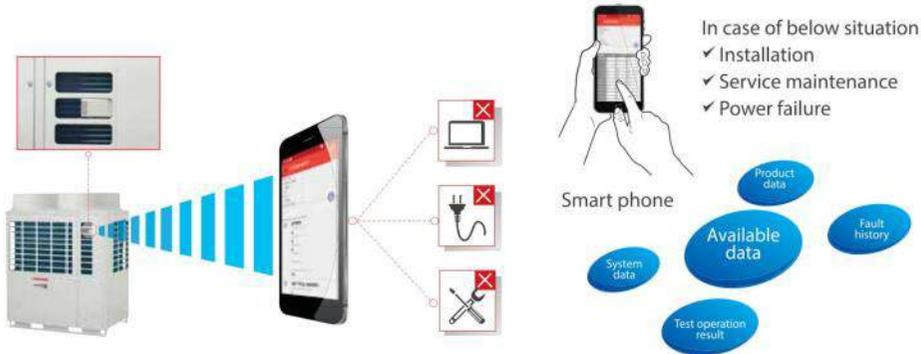

SMMS WAVE TOOL

DC TWIN-ROTARY COMPRESSOR

SMMS Wave Tool

With SMMS Wave Tool, you can read and write data from outdoor unit directly on your smart phone without the needs of connecting a PC or opening cabinet.

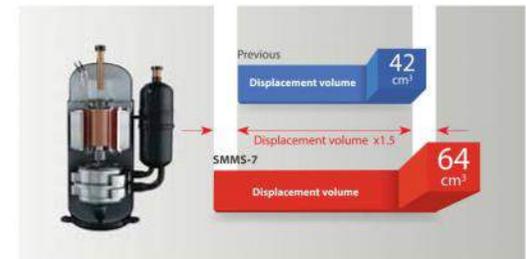

By the new smart phone application, the testing and commissioning can be done without opening the cabinet.

*Smartphone specification : Android™ OS 5.0

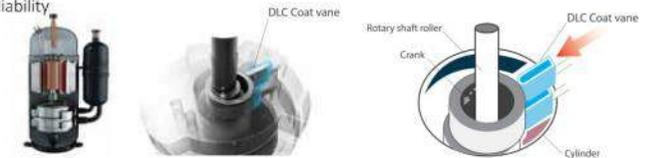

Wide range compressor

More powerful and efficient with the cutting-edge technology of compressor – DC Twin-Rotary operates in wider range of rotation speed.

DLC coated vane

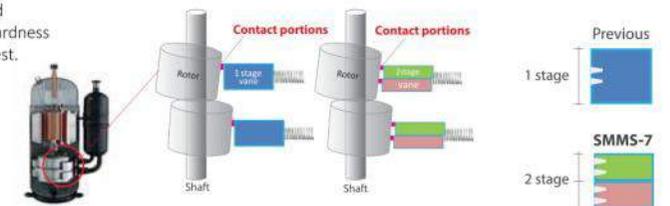

Increased hardness of the DLC coated vane reduces friction and increases both reliability and performance.

* DLC: Diamond Like Carbon

2-stage vane

2-stage vane is innovatively designed to reduce friction while increasing hardness and enhancing performance at its best.

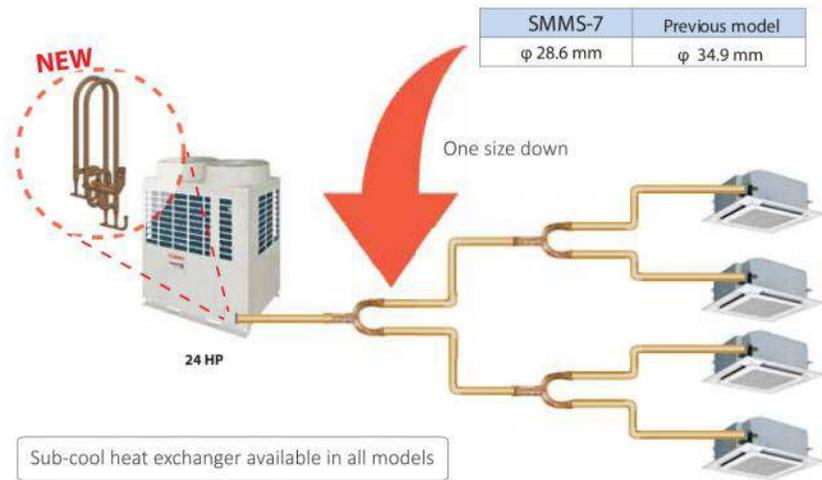

SLIMMER PIPE SIZE

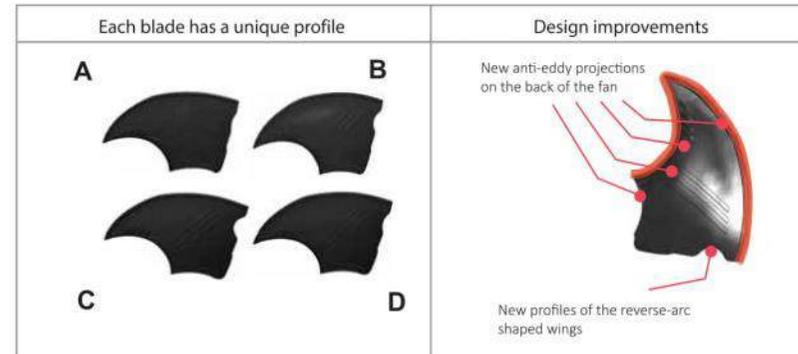

◀ Piping saving costs

With the sub-cool heat exchanger less refrigerant is needed, therefore now it is possible to use smaller pipes and save on installation costs.

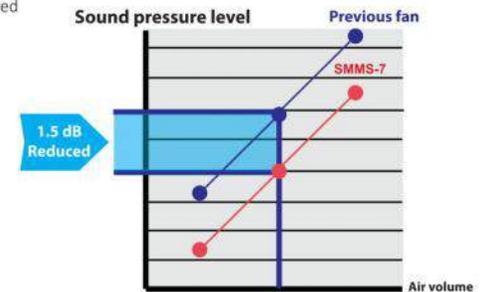

◀ New advanced blade shapes for a better air flow management

Every single blade is designed with a unique profile, a solution that guarantees smoother air flow without turbulences. The new propeller delivers the same amount of air with less sound pressure level.

◀ More quiet in comparison with the previous fan

In the same working condition, the new design of the propeller ensures a reduction of 1.5 dB compared to the previous models

- (Note)
1. If there is an obstacle at the upper side of the outdoor unit, set the top end of the outdoor unit 2000mm apart from the obstacle.
 2. Limit the height of the obstacle surrounding the outdoor unit to 800mm or less from the bottom end of the outdoor unit.
 3. Draw out the pipe procured locally to the front of the outdoor unit horizontally and keep 500mm or more between the outdoor unit and traversing pipe if placing pipe transversely.
 4. Dimensional drawing of corrosion heavy protection model is the same as that of standard model.

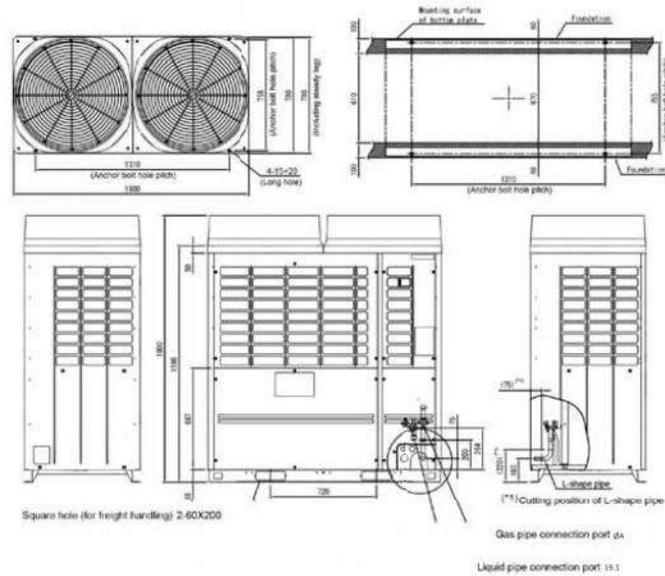

Model : MMY-MAP14A7T8P

*: Does not connect to refrigerant piping from outdoor unit. Control wires can be connected.

4-way Air Discharge Cassette Type
MMU-AP*4HP1-E**

Individual louver control

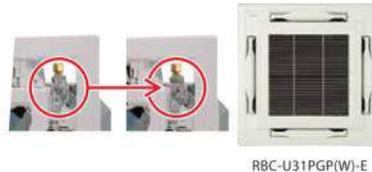

The angles of each of the four louver can be set individually
=> Enables airflow to be adapted to user preferences.

Note: RBC-AMT32E, RBC-AMS41E only

Easy installation

The panel is attached using the bolt already installed on the indoor unit.

RBC-U31PGP(W)-E

* Figures in parentheses are for ceiling panels.

Note 1: The capacities are measured under the conditions specified by JIS B 8615 based on the reference piping. The reference piping consists of 5 m of main piping and 2.5 m of branch piping connected with 0 m height.

Note 2: The sound levels are measured in an anechoic chamber in accordance with JIS B 8616.

Normally, the values measured in the actual operating environment become larger than the indicated values due to the effects of external sound.

Note 3: Rated conditions: Cooling: Indoor air temperature 27°C DB/19°C WB, Outdoor air temperature 35°C DB
Heating: Indoor air temperature 20°C DB, Outdoor air temperature 7°C DB/6°C WB

Options

Compact 4-way Cassette Type
MMU-AP*4MH1-E**

Perfect for grid system ceiling

Designed for simple & easy installation and maintenance

This compact unit (575 × 575 mm) fits perfectly into ceilings and matches standard architectural modules, without the need to cut ceiling tiles. The flaps fold tightly against the ceiling when operation stops so that the ceiling is affected only slightly even if air conditioning is installed.

The slim design is only 268 mm in height even when an electrical box is located inside the unit. Easy installation is also possible using the panel adjust pocket. Use the “adjust pocket” function for fine adjustments after installation. Available for ceilings up to 3.5 m in height. The drain-checking hole makes it possible to check the drain pan through the side case.

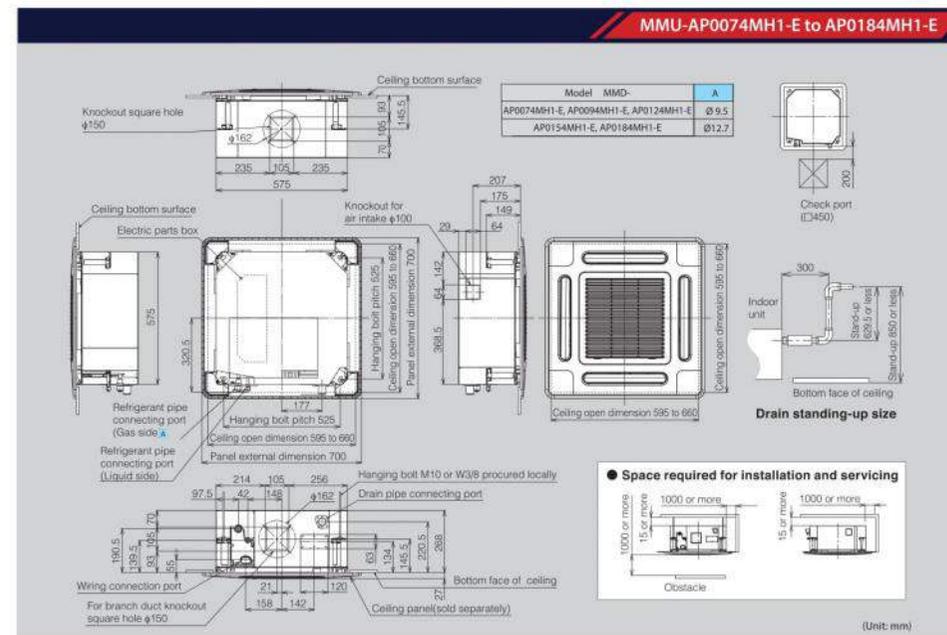

RBC-UM11PG(W/E)

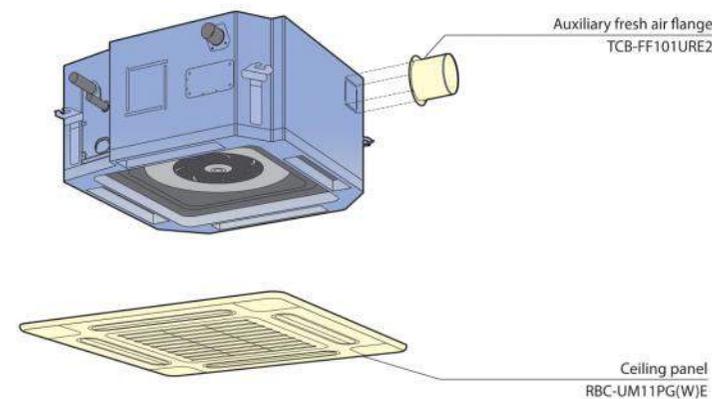

Drain-checking hole Maximum height

1-way Air Discharge Cassette Type

MMU-AP***4YH1-E
MMU-AP***4SH1-E

The perfect choice for hotels and reception areas

Fresh air intake is possible (MMU-AP***4SH1-E)

Silent sound design ensures the quiet required for the office.

Preparations/connection possible with a circle duct flange.

Ideal for smaller rooms where one-way air distribution is required.

Able to blow air straight out.

Condensate drain pump included.

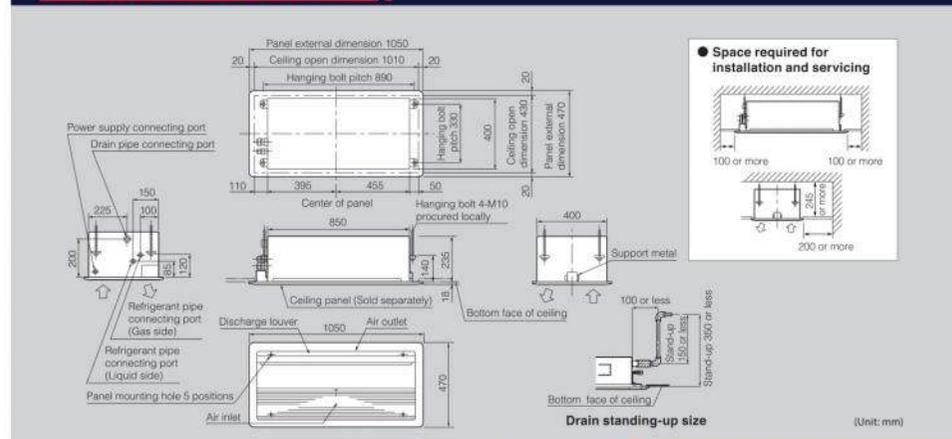

Long-life filters fitted as standard.

Options

Slim Duct Type

MMD-AP***4SPH1-E

Functional design

Only 210 mm in height for greater application flexibility.

4-step static pressure setup.

Concealed installation within a ceiling void.

Auxiliary fresh air intake available.

Slim & quiet

Perfect comfort throughout the room.

Can be used with any style of air diffuser.

Quiet, powerful operation.

Note 1 : The capacities are measured under the conditions specified by JIS B 8615 based on the reference piping. The reference piping consists of 5 m of main piping and 2.5 m of branch piping connected with 0 m height.

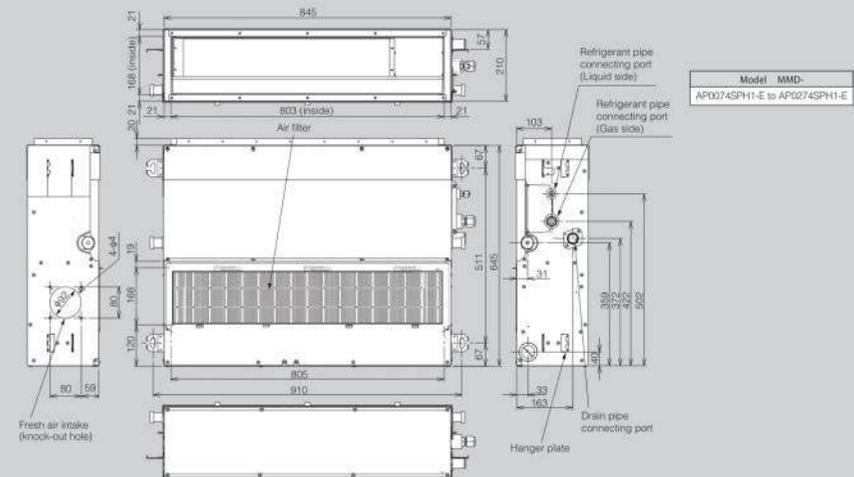

Note 2 : The sound levels are measured in an anechoic chamber in accordance with JIS B 8616.

Normally, the values measured in the actual operating environment become larger than the indicated values due to the effects of external sound.

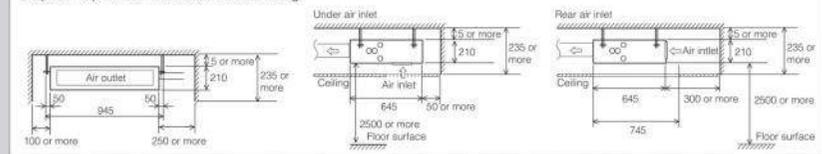

Note 3 : Rated conditions: Cooling: Indoor air temperature 28°C DB/19°C WB, Outdoor air temperature 35°C DB

Heating: Indoor air temperature 20°C DB, Outdoor air temperature 7°C DB/6°C WB

MMD-AP0074SPH1-E to AP0274SPH1-E

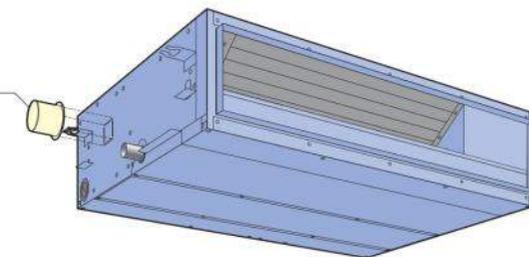

Space required for installation and servicing

(Unit: mm)

Options

Auxiliary fresh air flange
TCB-FF101URE2

Concealed Duct High Static Pressure Type

MMD-AP***6HP-E

MMD-AP***6HP1-E

Design flexibility

Satisfies all your design needs.
Compatible with external static pressures up to 250 Pa.

Can be equipped with the following options:

- High-efficiency filter (65, 90)
- Drain pump kit

Construction characteristics

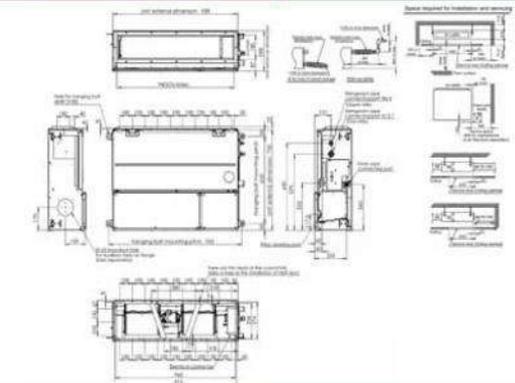

Three-stage-switchable static pressure.
The flexible duct is accessible.
Easy service and installation.
Inspection hole enables easy access and maintenance.

* Standard filter is provided, but deeper filtration filter needs to be purchased locally.

Options

Ceiling Type

MMC-AP***7HP1-E

Smooth Curve For Pliant Shape

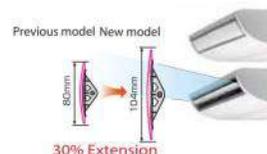

All-new chassis and new rounded design. These new models have been developed in response to customers' needs for ceiling units that better match their room interiors.

Smooth Curve For Pliant Shape

New fan has adopted the turbulence prevention rib to optimize the ventilating way. Air volume has increased and noise level also has decreased compared with previous model. Winds of new ceiling type of 4HP to 6HP can reach up to 4.3 metre.

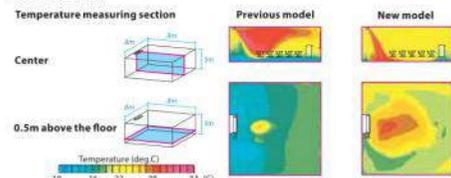

New Designed Wide Flap

The new air outlet has realized both High noise reduction and large air volume.

Flap control

The airflow angle is automatically set to the most suitable setting according to your cooling or heating needs, and an automatic swing mode enables airflow to reach all areas of the room to create a comfortable ambience.

Drain port (nominal dia.)	(cm)	ø 0.64				ø 0.95		
	(m)	0.025				0.039		
Sound pressure level*2 (High/Mid/Low)	(dB(A))	46/42/37		49/45/39		51/46/41		54/49/44

Note 1: The capacities are measured under the conditions specified by JIS B 8615 based on the reference piping.
The reference piping consists of 5 m of main piping and 2.5 m of branch piping connected with 0 m height.
Note 2: The sound levels are measured in an anechoic chamber in accordance with JIS B 8616.
Normally, the values measured in the actual operating environment become larger than the indicated values due to the effects of external sound.
Note 3: Rated conditions: Cooling: Indoor air temperature 27°C DB/19°C WB, Outdoor air temperature 35°C DB
Heating: Indoor air temperature 20°C DB, Outdoor air temperature 7°C DB/6°C WB

Floor Standing Duct Type

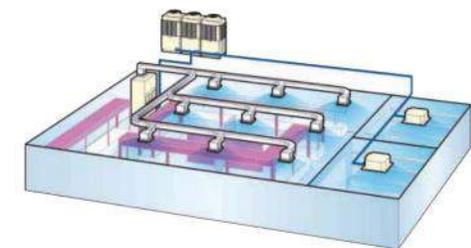

Higher static pressure
Available in a capacity range of 8 - 20 HP

Even Air-Conditioning of large spaces using duct
A maximum external static pressure of about 650Pa* can be provided. Superior air flow distribution is realized by optimum arrangement of air outlet when the ducts are installed.

Standard filter in-built
*When 16HP is modified (optional order) to change the fan rotation speed and increase the fan motor power.

Wired remote controller (Option)
RBC-AMT32E

*1: The capacities are measured under the conditions specified by JIS B 8615 based on the reference piping.
The reference piping consists of 5 m of main piping and 2.5 m of branch piping connected with 0 m height.
Rated conditions: Cooling: Indoor air temperature 27°C DB/19°C WB, Outdoor air temperature 35°C DB
Heating: Indoor air temperature 20°C DB, Outdoor air temperature 7°C DB/6°C WB
*2: The sound levels are measured in an anechoic chamber in accordance with JIS B 8616.
Normally, the values measured in the actual operating environment become larger than the indicated values due to the effects of external sound.

Technical specifications

Note 1. Provide enough space for servicing around the unit as shown below.

- At the time of factory shipments, drain piping serves as right-hand side. If you want to change the drain pipe on the left side, please change to the opposite side of the plug of the site.
*PT25A socket is included in the unit.
- Please Allow clearance of 500mm on the side of the pipe connection. Please Allow clearance of 100mm on the side of the pipe is not connected.

Floor Standing Direct Type

MMF-AP ***3H-VA

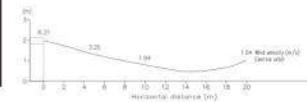

High static pressure

Available in a capacity range

of 8 - 20 HP.

Air flow distance up to about 30 m

The core air flow velocity of 0.3 m/s is up to 30 m from the unit. Air circulates far distances. Optimum for air conditioning large spaces.

Example: MMF-AP1923DH-V

Standard filter in-built

Can cover long horizontal distance

for air throw.

Frame + panel unit structure

The frame-mounted panel structure allows easy removal of the panel.

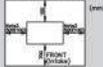

The fan section is extractable for easy maintenance of the fan unit area.

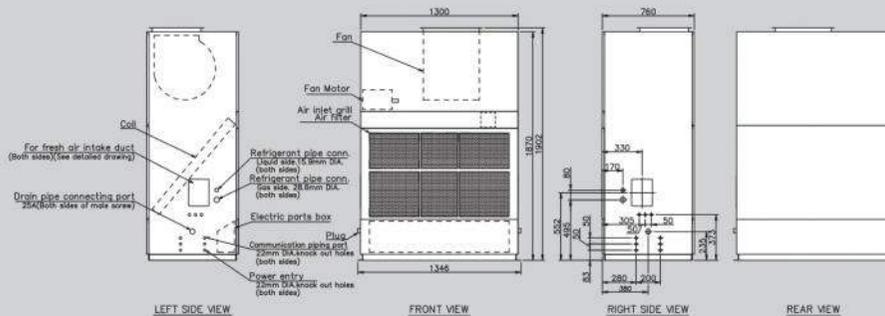

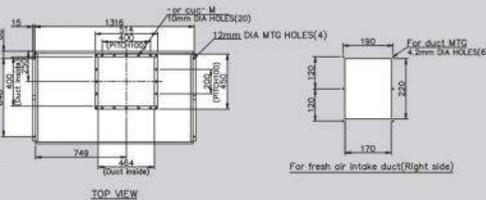

Wired remote controller (Option)
RBC-AMT32E

MMF-AP1443DH-V, MMF-AP1923DH-V

Note 1. Provide enough space for servicing around the unit as shown below.

Air -to- Air Heat Exchanger with DX-coil

MMD-VN*HEXE/HEXE2**

Greater comfort and reduced load

Functionality built into the cooling system reduces load on cooling beyond that of the heat exchanger itself. This improves air quality and ensures maximum comfort throughout the room being cooled.

Flexible control

Supply and exhaust fan speed ratios can be changed for improved air volume control that best matches the needs of the environment and location.

Free cooling at night

When the air outdoors is cooler at night, the system expels warm air from the room. This reduces the air conditioning load the next day for improved energy efficiency.

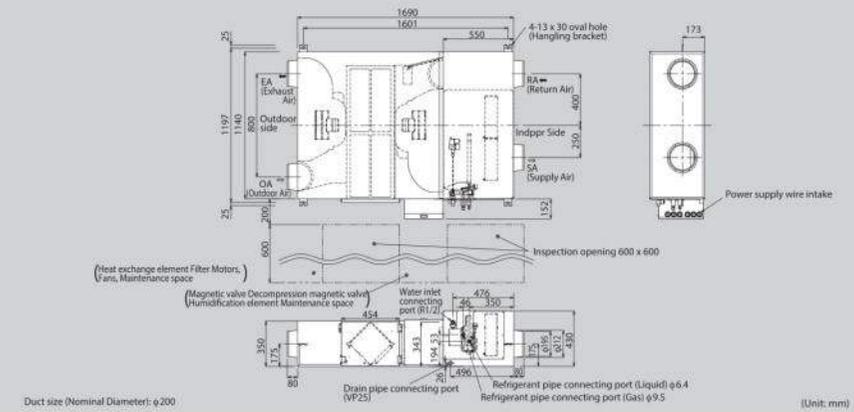

Remote controller

TCB-DP31HEXE

Air-to-Air Heat Exchanger (Stand alone unit)

VN-M***HE

Greater comfort and reduced load

Easily integrated into air conditioning systems of 150m³/h to 2000m³/h air volume, the Air-to-Air Heat Exchangers use exhaust air to pre-condition the incoming air, thus reducing the cooling or heating load and the overall size of the required system.

Free cooling at night

When the air outdoors is cooler at night, the system expels warm air from the room. This reduces the air conditioning load the next day for improved energy efficiency.

Easy maintenance

The heat exchange element can be washed in water.

Flexible control

Supply and exhaust fan speed ratios can be changed for improved air volume control that best matches the needs of the environment and location.

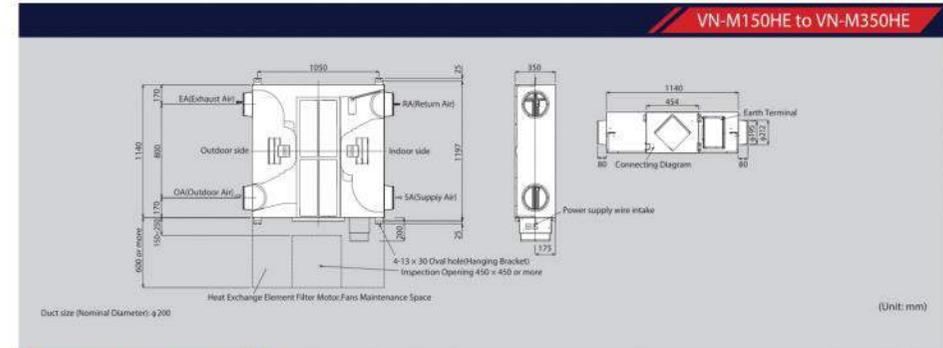

Remote controller NRC-01HE

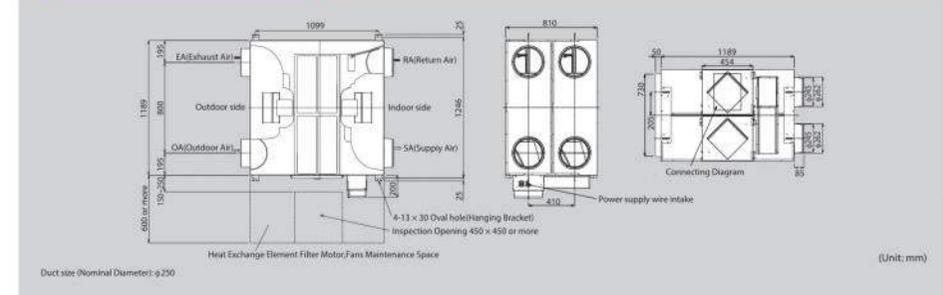

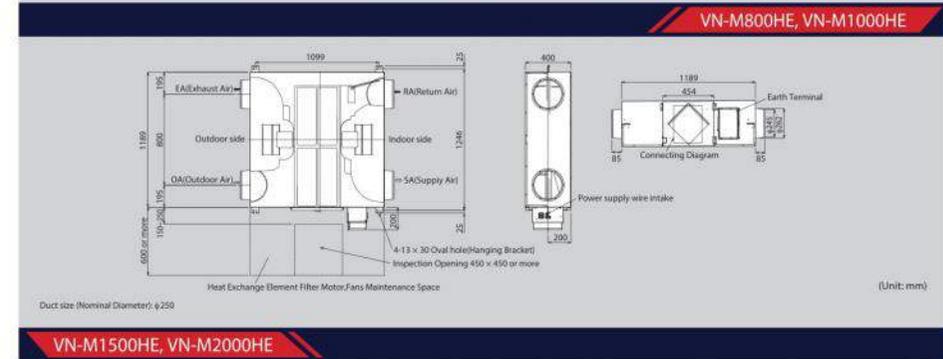

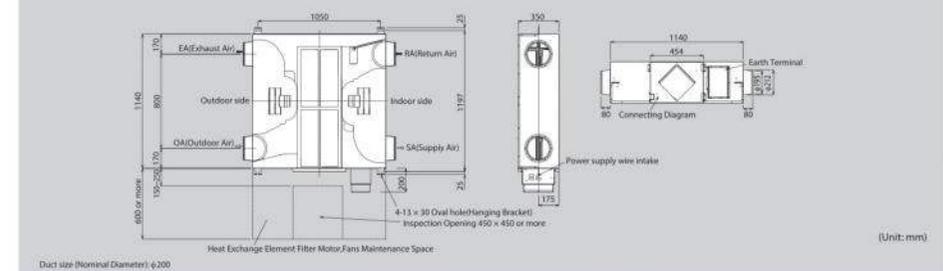

* Does not connect to refrigerant piping from outdoor unit. Control wires can be connected.

Wired remote controller

Wired remote controller
RBC-AM554E-EN
RBC-AM554E-ES

Wired remote controller with a built in 7-day timer-featuring a new multi-language, LCD display with backlight, energy saving options and a return back function.

- Possibility to set and display the room name to easily set-up and monitor the working parameter.
- New modern and desirable controller design with menu driven display.
- Save mode by schedule timer to optimise energy consumption.
- Room temperature display always available.
- Two "Hot Keys" (F1, F2) for easy operation of air conditioner functions.
- Easy to read layout including display of indoor unit model name and serial number.
- Built-in backup power. Settings are kept in memory up to 72 hours in case of power failure.
- Remote TA sensor available in controller.
- Can be connected to a single indoor unit or a group of up to 8 indoor units.

Standard remote controller
RBC-AMT32E

Standard wired remote controller can be connected to a single indoor unit or a group of up to 8 indoor units.

Power save operation limits the greatest current value. The remote controller allows error to be displayed while the protective device works or an error occurs.

Remote controller with weekly timer (7-day timer function)
RBC-AMS41E

- **Clock display**
- **Schedule timer:** Possible to program schedule timer (7-day timer) function. Possible to program 8 functions for each day of the week.

*The following items can be set in program: operation time, operation start/stop, operation mode, temperature setting, restriction on button operation

Simple wired remote controller
RBC-AS41E

- Start/Stop
- Temperature setting
- Air flow changing
- Check code display

Central remote controller

Compliant Manager
BMS-CM1280TLE

- **Operation**
Individual operation of 128 indoor units available
Return Back Operation
Weekly Schedule Operation* (ON/OFF)
- * Schedule timer necessary
- **Monitoring**
Zone setting (64 zones x 2)
Individual unit operation mode operation restriction
Alarm display
Control input
Status output

ON-OFF controller
TCB-CC163TLE2

- Individual control of up to 16 indoor units.
- Setting of simultaneous ON/OFF 3 times per day combined with the weekly timer.

Schedule timer
TCB-EXS21TLE

- **Schedule timer mode**
 - 6 programmings per day
 - Enabling 8 groups to be programmed
 - A maximum of 64 indoor units can be controlled
 - A maximum of 100 hours back-up power supply
- **Weekly timer mode**
 - 7 types of weekly schedule and 3 programmings per day

Wireless remote controller

Wireless remote controller kit & sensor unit (receiver unit)

- Start/Stop • Changing mode • Temperature setting
- Air flow changing
- Timer function
Either "ON" time or "OFF" time or "CYCLIC" can be set how many 30 min. later ON or OFF is operated.
- Control by 2 remote controllers is available. Two wireless remote controllers can operate one indoor unit. The indoor unit can then be operated separately from the two different locations.
- Check code display

*The wireless remote control cannot be connected to concealed duct high static pressure type.

RBC-AX33CE
Integral receiver
(For ceiling) (MMU-AP**4HP-E)
(MMU-AP**4SH1-E)

RBC-AX32U(W)-E
Integral receiver (For 4-way air discharge cassette)
(MMU-AP**4HP1-E)

TCB-AX32E2
Stand alone receiver
(For 4-way air discharge cassette, compact 4-way cassette
2-way air discharge cassette, ceiling, concealed duct standard, slim duct, floor standing cabinet, floor standing, 1-way discharge cassette)
(MMU-AP ***4YH1/SH1-E)

RBC-AX23UW(W)-E
Integral receiver (For 2-way air discharge cassette) (MMU-AP***2WH)

Other

Remote sensor
TCB-TC41LE

Install this sensor when outside air has been introduced or when overcooling and overheating are to be minimised.

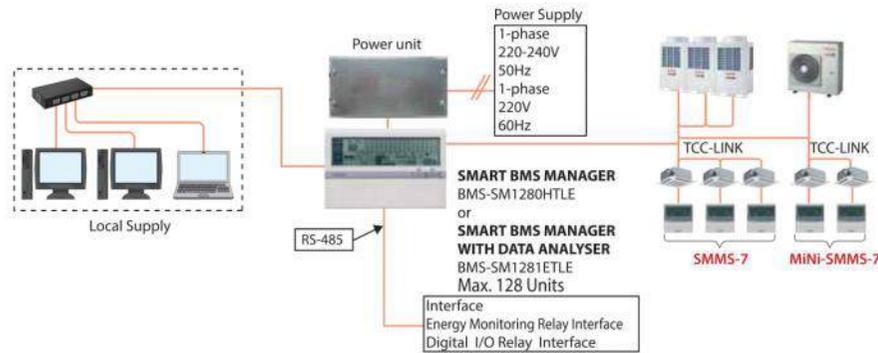

Wired remote controller for air to air heat exchanger
NRC-01HE

- Up to 8 units of the Air to Air Heat Exchanger can be operated using this remote controller.
- Control by 2 remote controllers is available. Two remote controllers can operate a single Air to Air Heat Exchanger.
- Air conditioning units may be controlled in addition to controlling the Air to Air Heat Exchanger.
- Central control allows linked ON/OFF operation of air conditioner and Air to Air Heat Exchanger.
- Central control can be set to allow standalone operation of the Air to Air Heat Exchanger.
- Switchable ventilation modes (Automatic/Air to Air/Normal)
- Switchable ventilation air volume (Extra-high/High-Low)

Building management systems

SMART BMS MANAGER / SMART BMS MANAGER WITH DATA ANALYSER

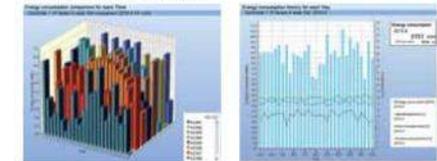

SMART BMS MANAGER
BMS-SM1280HTLE

SMART MANAGER WITH DATA ANALYSER
BMS-SM1281ETLE

Web browser control software

- List View available - Displays all indoor units in one screen
- Set View available - Shows basic indoor unit settings on main screen
- Advanced operation and master schedule functions available
- Advanced operation & master schedules can be set on a calendar
- Up to 4 concurrent users can be connected
- Up to 32 user accounts can be programmed with different levels of access (at least 1 must be administrator level)
- Energy monitoring and billing functions are available. Power meter locally supplied energy.
- Additional digital I/O device is available
- Thin profile controller and separate power supply unit enables easy installation
- Maximum 128 FCU

Energy monitoring display

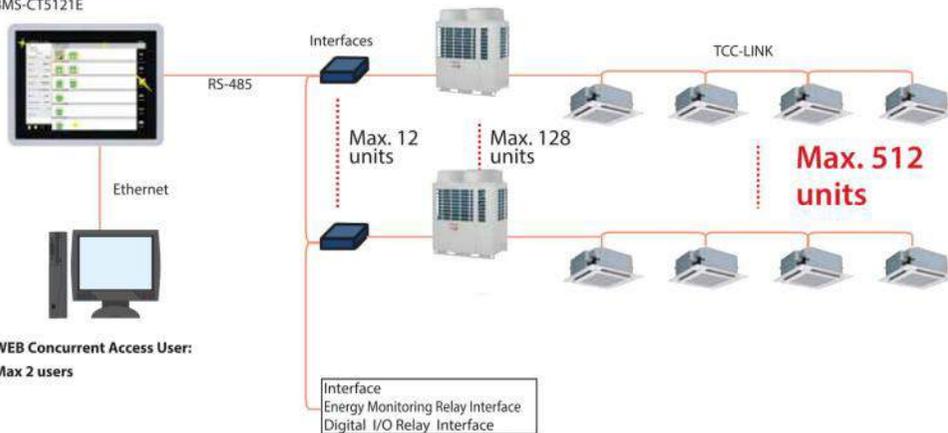

3D energy view

Daily energy view

Touch screen controller

TOUCH SCREEN CONTROLLER
BMS-CT5121E

TOUCH SCREEN CONTROLLER
BMS-CT5121E

• Touch screen controller

Using the touch screen controller provides a clear display and enables easy operation. A maximum of 512 units / groups are controllable.

• Energy monitoring and billing application

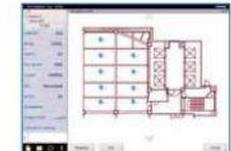

Power meter locally supplied Energy

• Web connection

• Layout diagram function (Option)

GRAPH FUNCTION

LAYOUT DIAGRAM FUNCTION
(OPTION)

FEATURES

- Icon display
- Return back function
- Save & demand control for outdoor unit
- Ventilation unit control & monitoring
- Setting temp. range control
- Setting temp. shift
- Layout diagram function (Option)

Relay Interface BMS-IFWHSE
For energy monitoring to connect power meter

Relay Interface BMS-IFDD03E
to connect external digital input/output

Relay Interface BMS-IFLSV4E
For TCS-NET (Max. 64 FCU/Unit)

◀ Open network systems

BACnet® system

BN Interface
BMS-IFBN640TLE

• **BACnet®**

The BACnet® system operates in conjunction with the BACnet®. Server uses object signals to provide the following functions:

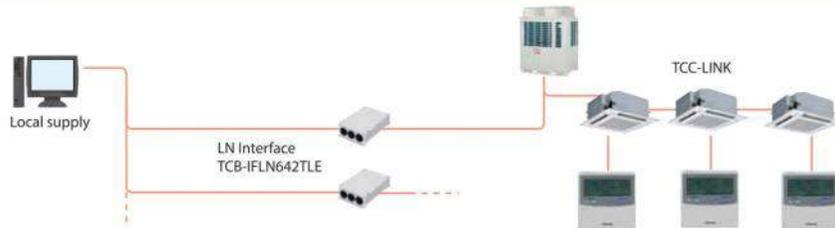

• **Control**

- ON/OFF
- Temperature setting
- Fan speed
- Max 64 units

• **Monitoring**

- ON/OFF
- Operation mode
- Temperature setting
- Room temperature
- Local remote controller : permit / prohibit

LonWorks®

LN Interface
TCB-IFLN642TLE

• **LonWorks® LN Interface**

The LonWorks® interface manages the SMMS-7 air conditioning system as a Lon device to communicate with the customer's Building Management System and to monitor operational status. A maximum of 64 units / groups are controllable per interface.

• **SNVT signal**

Signals and provides the following functions:

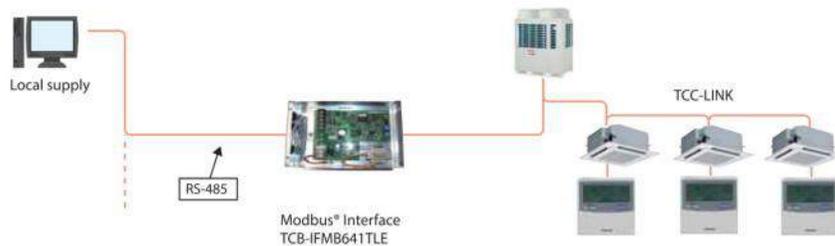

• **Control**

- ON/OFF
- Temperature setting
- Fan speed
- Max 64 FCU

• **Monitoring**

- ON/OFF
- Operation mode
- Temperature setting
- Room temperature
- Local remote controller : permit / prohibit

Modbus®

Modbus® Interface
TCB-IFMB641TLE

• **Modbus®**

The Modbus® interface manages the SMMS-7 air conditioning system as a Modbus® device to communicate with the customer's Building Management System. Accessible to 64 units / groups per one TCB-IFMB641TLE, 15 TCB-IFMB641TLEs on one Modbus® Master (prepared by user). Signals and provides the following functions:

• **Control**

- ON/OFF
- Temperature setting
- Fan speed
- Max 64 FCU

• **Monitoring**

- ON/OFF
- Operation mode
- Temperature setting
- Room temperature
- Local remote controller : permit / prohibit

1. LonWorks®: Registered trademark Echelon corporation.
2. BACnet®: ANSI/ASHRAE 135-2008, A data Communication Protocol for Building Automation and Control Networks.
3. Modbus® is a registered trademark of Schneider E.

Application controls

TCB-PCDM4E

Size: 71 x 85 (mm)

Power peak-cut control

• Feature

The upper limit capacity of the outdoor unit is restricted based on the outdoor power peak selected setting.

• Function

Two control settings are selectable by setting SW07 on the interface P.C. board on the outdoor unit.

TCB-PCMO4E

Size: 55.5 x 60 (mm)

Snowfall fan control

• Feature

The upper limit capacity of the outdoor unit is restricted based on the outdoor power peak selected setting.

External master ON/OFF control

• Feature

The outdoor unit starts or stops the system.

Night operation (Sound reduction) control

• Feature

Sound level can be reduced by restricting the compressor and fan speeds.

Operation mode selection control

• Feature

This control can restrict the selectable operation modes.

TCB-PCIN4E

Size: 73 x 79 (mm)

Error/Operation output control

• Feature

Enables external output of error and operation signals.

Compressor operation output

• Feature

Enables external signal output for each compressor that is in operation within any given outdoor unit. This feature provides a practical method for calculating total operating times for each compressor.

Operating rate output

• Feature

External output of system operating rates enables remote monitoring of operating conditions.

TCB-IFCB-4E2

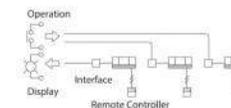

Size: 200 x 170 x 66 (mm)

Remote location ON/OFF control box

• Feature

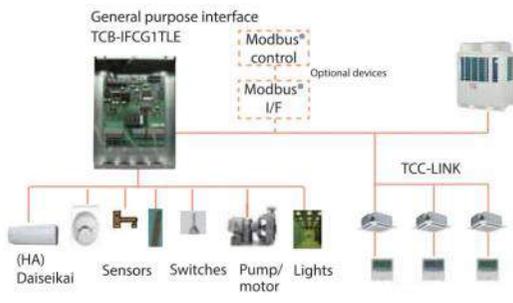

Start and stop of the air conditioner is possible by an external signal and indication of operation/ alarm externally.

Monitoring

ON/OFF status (for indoor unit)
Alarm status (system & indoor unit stop)
ON/OFF command
Air conditioner can be turned ON/OFF by the external signals.
The external ON/OFF signals will initiate the signals shown below.

General Purpose Interface

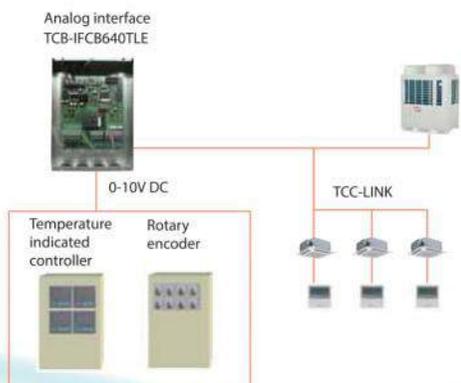

Concept

- Controls the operation status of each indoor unit.
- ON/OFF control of peripheral equipment via the relay point of Toshiba's BMS. (1pt only)

Standard function
Central remote controller and Building Management System devices can control ON/OFF function via digital I/O ports.

Optional function
Control using the following channels: 4-channel relay control, 6-channel digital input, 2-channel analog voltage input and output, and 2-channel temperature measurement functions via Modbus® I/F.

Analog Interface

Concept

- Provides access to 64 indoor units.
- Does not require special network knowledge.
- Can control each indoor unit on TCC-LINK, (on/off, temperature setting, airflow volume, louver position), and monitor status based on 0-10V DC voltage input.
- Enables relay control and status monitoring of general-purpose I/F TCB-IFCG1TLE.

Installation and the use of refrigerants not specified by Toshiba Carrier Corporation

Toshiba refrigeration and air-conditioning units are designed and manufactured on the assumption that the product is used with a specific refrigerant suitable for each unit.

We have recently seen some cases where the type of refrigerant used is different from the one originally installed in the product. Such actions may cause mechanical defects, malfunctions, failures and in some cases result in a serious safety issue. Therefore do not install any refrigerant other than the one specified by Toshiba Carrier Corporation for its respective products.

The type of the refrigerant used for each of our products is shown in the accompanying owners manual, or on the product label attached on the product itself.

Toshiba Carrier Corporation shall not assume any liability for failures, malfunctions or safety in its products if the refrigerant used is different from the one specified.

SAFETY PRECAUTIONS

For operation:

- Before use, read through the operating instructions to ensure proper use.

Concerning the purpose for which the air conditioners are to be used

- The air conditioners presented in this catalogue are air conditioning/heating units to be used solely by general consumers.
 - Do not use these air conditioners for special applications such as for the storage of food items, animals, plants, precision machines or works of art. Doing so may degrade the quality of the items.
 - Do not use these air conditioners for air-conditioning applications in vehicles or ships. Doing so may cause water and/or power leakages.

Precautions for using air conditioners

Concerning the automatic defrosting unit

When the outdoor air temperature drops, frost may form on the heat exchanger of the outdoor unit. In such cases, the automatic defrosting unit will be activated, and it will take 5 to 8 minutes for the heating operation to be restored.

Concerning the air conditioner's operating conditions and their selection

- Avoid using the air conditioner in the following locations.
 - Locations with acidic or alkaline atmospheres (locations at which highly acidic or alkaline air is directly drawn in, such as in hot springs areas from which sulfur gases are given off, or where chemicals, vinegar, exhaust air from burners, etc., are given off) The heat exchangers and other parts may become corroded.
 - Locations with atmospheres filled with coolant or other machine oil or steam exhaust (such as at food preparation factories or machine plants). The heat exchangers may corrode; frost may form as a result of heat exchanger malfunction; air conditioner operating performance may be compromised or condensation may form as a result of clogged filters; plastic parts may incur damage; heat-insulation materials may become separated, etc.
- Before using an air conditioner in any of the following locations, consult with your dealer or a qualified contractor.
 - Locations where vapors from edible oils are given off (such as in bakeries or kitchens and restaurants that use edible oils) ...The air conditioner's operating performance may be compromised or condensation may form as a result of clogged filters, and the plastic parts may incur damage. In line with the prevailing conditions, take counter measures such as tailoring the installation conditions in accordance with the conditions, using air conditioners designed for kitchens or oil guard filters, etc.
 - Locations with disinfectant-induced chlorine atmospheres (water tanks, etc.) The metal parts in the heat exchangers, motors, etc., may become corroded.
 - Locations with high salinity (coastal areas, etc.) Corrosion may occur so use outdoor units specifically designed to withstand exposure to salt.
- Concerning use in locations with high ceilings
 - In locations with high ceilings, use of circulators for improving the temperature distribution during heating is recommended.
- Concerning use in high-humidity environments
 - When the ceiling-recessed type of indoor unit is installed in a location, such as those described below, and it is very hot and humid inside the ceiling, condensation may form on the external surfaces of the indoor unit and drip down. In such cases, add external heat-insulating materials.
 - Locations such as food preparation sites in which the areas above the ceilings are hot and humid
 - Locations in which outside air is drawn in and routed above the ceiling
 - Above ceilings with a slate roof or tiled roof overhead
- Even when an air conditioner is shut down, it will still consume a small amount of power to protect the unit. If the air conditioner will not be used for a prolonged period, turn OFF the main switch (ground fault circuit breaker). However, before the unit is to be used again, turn ON the main switch (ground fault circuit breaker) for at least 12 hours in order to prevent trouble.
